Category return-adjusted profit

Top stakeholder insights

1. Churn Rate is currently 76.8%.

Monitor trend by segment, channel, cohort, and product category before taking broad action.

2. Revenue Leakage from Returns and Discounts is currently \$28,247,631.

Monitor trend by segment, channel, cohort, and product category before taking broad action.

3. High Value Loyal Customers 2 is the most profitable customer segment.

Protect this segment with margin-aware loyalty benefits and service recovery triggers.

4. One-time Buyers has the highest churn exposure.

Use win-back journeys only where expected value is positive; suppress low-value inactive customers.

WATCH ITEM

Retention rate below executive threshold

Decision rule: protect profitable loyal customers, fix return-heavy categories, grow high-CLV acquisition paths, and monitor drift/quality before every executive refresh.

Source: generated platform marts, KPI engine, validation framework, model monitoring, and model registry.
